PRIMARY EXAMINER

Claims 1-20 are allowed over the prior art of record.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence H. Aaronson on April 26, 2007.

The application has been amended as follows:

Claim 1, line 1, before "messaging client" please delete "A" and insert --A communication terminal having a--

The following is an examiner's statement of reasons for allowance:

The prior art of record to Serdy et al. hereinafter Serdy is directed to responding to Truncated Electronic Mail Messages. For example, a computing device (14) sends electronic mail messages of only predetermined length to a mobile device (12). A user can optionally select a predetermined number of lines of text in the main message body, which the user wishes to receive. When computing device receives an electronic mail message which to be transmitted to the mobile device, computing device truncates the message body to the predetermined number of lines and sends the truncated electronic mail message to mobile device. When the user reviews the truncated email message, the user can select that message for a complete download, in which case computing

device downloads the entire message body to mobile device so that the user can review the entire message (see paragraph 0081).

The prior art of record to Mettala et al. disclose a method to limit the size of synchronizing messages. A first device specifies a maximum message size for synchronization messages to be sent to the first device and transmits information on the maximum message size to a second device. The second device transmits to the first device synchronization messages that do not exceed the maximum message size.

The prior art to Sekiguchi provides a method that enables the retransmission of an email if an error occurs in the transmission of the email due to its excessive data size, by reducing the data capacity of the email.

However, after an exhaustive search, it is concluded that the prior art of record fails to teach or suggest a reply message comprising a reply message text and only so much of an original message text as will fit together with at least the reply message text in a maximum message capacity; then, sending the reply message.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
